

SAHIL JHAWAR

✉ jhawar@uni-potsdam.de ♦ [in](#) jhawarji ♦ [G](#) sahiljhawar

INTRODUCTION

A postgraduate student with scientific training and temperament. Gained valuable experience while working on research projects that demand sound analytical and problem solving skills, adaptability and sound understanding of programming, Physics and Mathematics. I look at things scientifically and make sure that I learn everything about it. I like to know about new technologies and the way they function.

EDUCATION

Universität Potsdam, Potsdam
Master of Science in Astrophysics

October 2021 - Present

Coursework:

- Gravitational Wave Astrophysics
- Atomic Spectroscopy
- Computational Astrophysics
- General Relativity
- Stellar Evolution
- Bayesian Inference
- Multi-messenger astronomy
- Galactic Dynamics
- Statistics

Christ (Deemed to be University), Bengaluru
Bachelor of Science (Physics, Maths and Electronics)
GPA: 3.68/4.0

July 2018 - June 2021

Final Year Project: Gesture Controlled System based on Raspberry Pi Pico

WORK

Theoretical Astrophysics Group
Master's Thesis

March 2023 - Present

Universität Potsdam, Potsdam

Master's thesis student under **Prof. Dr. Tim Dietrich**.

- Working on Bayesian techniques for Multi Messenger Astronomy using *NMMA* [G](#).
- Characterizing the non stationary systematic uncertainties that arise in the modeling of electromagnetic counterparts of multi-messenger source (draft PR [G](#))
- Using parallel computing techniques such as MPI and multi-threading to make inferences and analysis faster.

4-MOST

December 2022 - Present

Student Assistant

Leibniz-Institut für Astrophysik Potsdam (AIP), Potsdam

Student Assistant in the Project Management team for building (integration, installation and maintenance) the 4-metre Multi-Object Spectroscopic Telescope *4MOST*.

- Participating in a 3 weeks coding campaign for the *4MOST* commissioning, followed by one week commissioning bootcamp (November 2023)
- Collaborating with a team of 5 developers, following the Scrum agile methodology, to deliver high-quality code in short iterations, with regular feedback from stakeholders/product owner.
- Using Python (OOP and scientific computing) to implement various commissioning procedures.
- Utilized technical skills in troubleshooting and problem-solving within the specialized environment of an astronomical integration hall.

- Proactively managed procurement activities, liaising with vendors to procure essential large-scale items for the integration hall, ensuring timely delivery while adhering to budget constraints.
- Engaged in data analysis, providing insights to the telescope detectors

PUBLICATIONS

1. *Data driven study on kilonova modelling systematics via Bayesian analysis.* In preparation.
2. T. Hussenot-Desenonges et al. *Multi-band analyses of the bright GRB 230812B and the associated SN2023pel.* 2023. arXiv: 2310.14310 [astro-ph.HE].

RESEARCH PROJECTS

Research workshop on evolved stars

August 2022 - September 2022

Participant

University of Potsdam & Astronomical Institute of CAS, Prague

Created a target list of handful of stars from a catalogue of few hundred thousand stars and obtained spectras using Perek 2m telescope at Ondřejov Observatory. Data reduction and analysis was done using IRAF and visualised through Python.

Radio Astronomy Winter School 2020

December 2020 - January 2021

Winter Student

IUCAA & NCRA-TIFR, India

Learned basics of radio astronomy and its instrumentation and computational field. Also worked on few physical experiments and worked on GMRT and ORT data using Python.

Detailed reports can be found here

Krittika

May 2020 - August 2020

Summer Project Intern

IIT Bombay, India

Developed a Python package to analyse various types of binary star system.

TECHNICAL PROJECTS

NMMA

contributor and maintainer

A Pythonic library for probing nuclear physics and cosmology with multi messenger analysis.

directory-cleaner

Python script to help you clean your directory by rearranging the files in sub-directories as per the file kind.

git-overleaf-sync

Python script that let's you sync your overleaf documents with GitHub/GitLab for free and efficient version control.

cowin-vaccine

Python script to help you know the availability of vaccines around you (CoWIN).

OUTREACH AND COMMUNITY ENGAGEMENT

Let's Talk Astronomy, Christ

November 2019 - January 2021

Student coordinator

Bengaluru, India

Acted as a liaison between students and faculty. Conducted 15+ talks.

LIGO-India, Vigyan Samagam (DAE-DST-NCSM, G.O.I)

September - December 2019

Scientific Communicator

Bengaluru and Kolkata

Successfully played a role of science communicator by explaining GW Science and GW Exhibits to the audience of all ages. Catered to nearly 500 visitors

Worked with hospitality committee to cater to all needs of guests and help in the smooth running of the conference during the 37th Annual Meeting of ASI at Christ (Deemed to be University).

OBSERVING EXPERIENCE

Perek 2m Telescope	Assisted with 7 nights (Ondřejov, Czech Republic)
OST 0.5m Telescope	Assisted with 2 nights (Potsdam, Germany)

SKILLS

Technical	Python, C/C++, L ^A T _E X, Git, Unix based OS and Windows, MS Office
Packages and tools	NumPy, SciPy, Pandas, Matplotlib, Astropy
Personal	Critical thinking, Problem solving, Leadership, Research and Analysis
Language	English and Hindi

CERTIFICATIONS/MOOCs

Light and Beyond (2020)	ICTS, Bengaluru
Astronomy and Astrophysics (2019)	MPBIFR, Bengaluru

CO-CURRICULAR ACTIVITIES

POSITIONS OF RESPONSIBILITY

Student Coordinator of Mathematics Association, Christ

Student Coordinator of Sequence 2021, Christ

Student Coordinator of Event Horizon 2021, Christ

Head of Events Core Committee for Sequence 2020, Christ

Event Head in Eureka 2019, Christ

PRIZES, AWARDS AND HONORS

- Awarded a scholarship of ₹35,000 (~ €400) by Badrilal Soni Maheshwari Shiksha Sahyog Kendra, India (2023)
- Awarded co-curricular activities based scholarship from Christ (Deemed to be University) (2021)
- Won numerous inter and intra collegiate events, and successfully lead a team of players resulting in various rolling trophies for the department (2018-2021)
- Gold honor in International Astronomy and Astrophysics Competition (IAAC), secured 38/40 and placed in the top 1% worldwide (2020)
