EDUCATION

Universität Potsdam

Master of Science in Astrophysics

Grade*: 1.7 (gut/good)

Thesis 

October 2021 - June 2025

Potsdam, Germany

Christ (Deemed to be University)

Bachelor of Science (Physics, Maths and Electronics)

GPA: 3.68/4.0

July 2018 - June 2021

Bengaluru, India

Final Year Project: Gesture Controlled System based on Raspberry Pi Pico  Report

SKILLS

Technical Languages

Python, C/C++, $\text{\LaTeX}$, MATLAB, SQL

Technical Skills

Git (-Lab and -Hub), Unix based OS and Windows, Bayesian Inference, Data analysis and visualisation, DevOps, Docker, Apptainer/Singularity

Packages and tools

NumPy, SciPy, Pandas, Matplotlib, Astropy, Bilby, Seaborn, Sphinx, TensorFlow, scikit-learn, JAX, PyTorch, CuPy, Streamlit, Selenium, bs4, PyBind, CI/CD, Parallel computing

WORK EXPERIENCE

GFZ Helmholtz Centre for Geosciences

Research Scientist - February 2026 - Present

Research Assistant - July 2025 - December 2025

Student Assistant - July 2024 - June 2025

July 2024 - Present

Potsdam, Germany

Software Developer in the Section 1.5 - Space Physics and Space Weather

- Developed a real-time ETL pipeline and testing framework for processing NASA/JAXA spacecraft data, implementing over 5,000 lines of code.
- Contributed to the development of EL-PASO, an open source Python framework for processing and standardizing multi-mission satellite particle observations (paper under review).
- Implemented CUDA/CuPy acceleration for interpolation routines, achieving more than a 10× speedup compared to NumPy/SciPy implementations.
- Built reproducible Apptainer/Singularity workflows for deployment on the European Space Agency's HPC infrastructure.
- Developed software deliverables for the European Space Agency as part of funded research projects.
- Developed orchestration and utility codes, reducing maintenance overhead by approximately 50%, and implemented structured logging, monitoring, and automated validation to improve debugging, reliability, and fault detection in operational space weather forecasting pipelines.
- Maintaining the section's operational Kp forecasting pipeline and developed the Kp alert system.

Leibniz-Institut für Astrophysik Potsdam (AIP)

Student Assistant

December 2022 - March 2024

Potsdam, Germany

Student Assistant in the Project Management team for building (integration, installation and maintenance) the 4-metre Multi-Object Spectroscopic Telescope *4MOST*.

*See here on how to interpret German grade: Welche Form der Benotung wird an der Uni Potsdam verwendet?

- Implemented *4MOST* commissioning procedures during 3 week coding campaign (November 2023)
- Utilized technical skills in troubleshooting and problem-solving within the specialized environment of an astronomical integration hall.
- Proactively managed procurement activities, liaising with vendors to procure essential large-scale items for the integration hall.

RESEARCH EXPERIENCE

Theoretical Astrophysics Group, Universität Potsdam

March 2023 - June 2025

Master's Thesis

Potsdam, Germany

Master's thesis student under **Prof. Dr. Tim Dietrich**.

- Maintaining and contributing to software infrastructure with over 60 forks, 40+ stars, and 15,000+ Conda downloads.
- Developed Bayesian models for analyzing astronomical datasets using NMMA, focusing on optimizing parameter estimation.
- Quantified and minimized non-stationary uncertainties by 2-10x in astrophysical parameter estimation and predictions.
- Designed a SHA-256 hash-based system to verify and automate file replacement for data consistency required for astrophysical simulations.
- Presented my findings as the first author on one research paper and as a co-author on another.

Universität Potsdam & Astronomical Institute of CAS

August 2022 - September 2022

Participant

Prague, Czech Republic

- Utilized the Perek 2m telescope at the Ondřejov Observatory to acquire stellar spectra
- Performed data reduction and analysis using IRAF Python for data visualization

IUCAA & NCRA-TIFR

December 2020 - January 2021

Winter Student

Pune, India

Radio Astronomy Winter School 2020: Learned basics of radio astronomy, from theory to instrumentation and computational aspects. Workshop enabled me to work on few physical experiments and on GMRT and ORT data of Vela pulsar.

🔗 *Detailed reports can be found here*

Krittika, IIT Bombay

May 2020 - August 2020

Summer Project Intern

Mumbai, India

Developed a Python package to analyse various types of binary star system.

TECHNICAL PROJECTS

SWVO

contributor and maintainer

Tools for downloading and reading space-weather data and geomagnetic indices.

EL-PASO

contributor and maintainer

EL-PASO is a Python framework designed to streamline the download, processing, and saving of satellite particle observation data.

reuseify

Automate REUSE license annotation from git history.

Kp Alert

Python-based system for monitoring forecasted Kp index and sending automated alerts.

NMMA

former contributor and maintainer

A Pythonic library for probing nuclear physics and cosmology with multimessenger analysis.

nbody

Direct N-body code with C++ and JAX backends.

Gstrain

Interactive Gravitational Wave strain viewer using Streamlit & Plotly. Check it out here 

BibQuest

Automagically fill your bib file just using bib keys

uptime

A Github Action and Pages based uptime monitor in Python.

ACADEMIC VISITS AND TRAINING

2026 Summer school on Machine Learning for Space 2026 at KTH Stockholm, Sweden

2026 High-performance computing with Python at Forschungszentrum Jülich (online)

2024 Fully funded visiting fellowship by European Union's Horizon 2020 Programme under the AHEAD 2020 hosted by Dr. Mattia Bulla at University of Ferrara, Italy

2024 Fellowship of €500 by ESA for dotAstronomy 2024, ESAC Madrid, Spain

PRIZES, AWARDS AND HONORS

2023 Scholarship of ₹35,000 by Badrilal Soni Maheshwari Shiksha Sahyog Kendra, India

2021 Awarded co-curricular activities based scholarship from Christ (Deemed to be University)

2021 Won numerous inter and intra collegiate events, and successfully lead a team of players resulting in various rolling trophies for the department

2020 Gold honor in International Astronomy and Astrophysics Competition (IAAC), secured 38/40 and placed in the top 1% worldwide
