✉ sahil.jhawar448@gmail.com ◇  jhawarji ◇  sahiljhawar ◇  sahiljhawar.in

## EDUCATION

### Universität Potsdam

Master of Science in Astrophysics

Grade\*: 1.7 (gut/good)

Thesis 

October 2021 - June 2025

Potsdam, Germany

### Christ (Deemed to be University)

Bachelor of Science (Physics, Maths and Electronics)

GPA: 3.68/4.0

July 2018 - June 2021

Bengaluru, India

**Final Year Project:** Gesture Controlled System based on Raspberry Pi Pico  Report

## SKILLS

### Technical Languages

Python, C/C++, L<sup>A</sup>T<sub>E</sub>X, MATLAB, SQL

### Technical Skills

Git (-Lab and -Hub), Unix based OS and Windows, Bayesian Inference, Data analysis and visualisation, DevOps, Docker, Apptainer/Singularity

### Packages and tools

NumPy, SciPy, Pandas, Matplotlib, Astropy, Bilby, Seaborn, Sphinx, TensorFlow, scikit-learn, JAX, PyTorch, CuPy, Streamlit, Selenium, bs4, PyBind, CI\CD, Parallel computing

## WORK EXPERIENCE

### GFZ Helmholtz Centre for Geosciences

Research Scientist - February 2026 - Present

Research Assistant - July 2025 - December 2025

Student Assistant - July 2024 - June 2025

July 2024 - Present

Potsdam, Germany

Software Developer in the Section 1.5 - Space Physics and Space Weather

- Developed a real-time ETL pipeline and testing framework for processing NASA/JAXA spacecraft data, implementing over 5,000 lines of code.
- Contributed to the development of EL-PASO, an open source Python framework for processing and standardizing multi-mission satellite particle observations (paper under review).
- Implemented CUDA/CuPy acceleration for interpolation routines, achieving more than a 10× speedup compared to NumPy/SciPy implementations.
- Built reproducible Apptainer/Singularity workflows for deployment on the European Space Agency's HPC infrastructure.
- Developed software deliverables for the European Space Agency as part of funded research projects.
- Developed orchestration and utility codes, reducing maintenance overhead by approximately 50%, and implemented structured logging, monitoring, and automated validation to improve debugging, reliability, and fault detection in operational space weather forecasting pipelines.
- Maintaining the section's operational Kp forecasting pipeline and developed the Kp alert system.

### Leibniz-Institut für Astrophysik Potsdam (AIP)

Student Assistant

Student Assistant in the Project Management team for building (integration, installation and maintenance) the 4-metre Multi-Object Spectroscopic Telescope 4MOST.

December 2022 - March 2024

Potsdam, Germany

\*See here on how to interpret German grade: Welche Form der Benotung wird an der Uni Potsdam verwendet?

- Implemented *4MOST* commissioning procedures during 3 week coding campaign (November 2023)
- Utilized technical skills in troubleshooting and problem-solving within the specialized environment of an astronomical integration hall.
- Proactively managed procurement activities, liaising with vendors to procure essential large-scale items for the integration hall.

## RESEARCH EXPERIENCE

---

### Theoretical Astrophysics Group, Universität Potsdam

March 2023 - June 2025

*Master's Thesis*

Potsdam, Germany

Master's thesis student under **Prof. Dr. Tim Dietrich**.

- Maintaining and contributing to software infrastructure with over 60 forks, 40+ stars, and 15,000+ Conda downloads.
- Developed Bayesian models for analyzing astronomical datasets using NMMA, focusing on optimizing parameter estimation.
- Quantified and minimized non-stationary uncertainties by 2-10x in astrophysical parameter estimation and predictions.
- Designed a SHA-256 hash-based system to verify and automate file replacement for data consistency required for astrophysical simulations.
- Presented my findings as the first author on one research paper and as a co-author on another.

### Universität Potsdam & Astronomical Institute of CAS

August 2022 - September 2022

*Participant*

Prague, Czech Republic

- Utilized the Perek 2m telescope at the Ondřejov Observatory to acquire stellar spectra
- Performed data reduction and analysis using IRAF Python for data visualization

### IUCAA & NCRA-TIFR

December 2020 - January 2021

*Winter Student*

Pune, India

**Radio Astronomy Winter School 2020:** Learned basics of radio astronomy, from theory to instrumentation and computational aspects. Workshop enabled me to work on few physical experiments and on GMRT and ORT data of Vela pulsar.

🔗 *Detailed reports can be found here*

### Krittika, IIT Bombay

May 2020 - August 2020

*Summer Project Intern*

Mumbai, India

Developed a Python package to analyse various types of binary star system.

## PUBLICATIONS

## TECHNICAL PROJECTS

---

## SWVO

*contributor and maintainer*

Tools for downloading and reading space-weather data and geomagnetic indices.

## EL-PASO

*contributor and maintainer*

EL-PASO is a Python framework designed to streamline the download, processing, and saving of satellite particle observation data.

## reuseify

Automate REUSE license annotation from git history.

## Kp Alert

Python-based system for monitoring forecasted Kp index and sending automated alerts.

## NMMA

*former contributor and maintainer*

A Pythonic library for probing nuclear physics and cosmology with multimessenger analysis.

## nbody

Direct N-body code with C++ and JAX backends.

## Gstrain

Interactive Gravitational Wave strain viewer using Streamlit & Plotly. Check it out here 

## BibQuest

Automagically fill your bib file just using bib keys

## uptime

A Github Action and Pages based uptime monitor in Python.

## ACADEMIC VISITS AND TRAINING

---

- 2026** Summer school on Machine Learning for Space 2026 at KTH Stockholm, Sweden
- 2026** High-performance computing with Python at Forschungszentrum Jülich (online)
- 2024** Fully funded visiting fellowship by European Union's Horizon 2020 Programme under the AHEAD 2020 hosted by Dr. Mattia Bulla at University of Ferrara, Italy
- 2024** Fellowship of €500 by ESA for dotAstronomy 2024, ESAC Madrid, Spain

## PRIZES, AWARDS AND HONORS

---

- 2023** Scholarship of ₹35,000 by Badrilal Soni Maheshwari Shiksha Sahyog Kendra, India
- 2021** Awarded co-curricular activities based scholarship from Christ (Deemed to be University)
- 2021** Won numerous inter and intra collegiate events, and successfully lead a team of players resulting in various rolling trophies for the department
- 2020** Gold honor in International Astronomy and Astrophysics Competition (IAAC), secured 38/40 and placed in the top 1% worldwide
